ID Verification

Verify government-issued IDs in seconds.

What is ID Verification?

AuthenticID's ID Verification solutions offer 100% automated, instant ID document verification. Our fused AI and machine learning technology provides 99%+ accuracy in detecting even the most sophisticated fraudulent documents.

How? AuthenticID's proprietary technology combines machine learning and AI to review over 500 forensic checks to verify an ID's authenticity.

Industry Leading Speed and User Experience

Our proprietary capture technology allows us to optimize and process the most difficult images and backgrounds. In just seconds, transactions are completed providing a quick and seamless user experience with industry leading conversion rates.

Instant Data Extraction for Form Filling

AuthenticID's proprietary technology uses optical character recognition (OCR) to extract the information from the ID to populate customer forms instantly. OCR Data is matched against extracted MRZ or barcode data to ensure the highest levels of accuracy. This system reduces time and mistakes made during customer onboarding process to improve conversion rates.

ID Security Feature Detection

Platinum Features

🔵 **Superior Image Capture Technology**

For certain use cases, capture and process low-quality images with the most challenging backgrounds and lighting.

🔵 **Smooth User Experience**

Enhancements offer fewer clicks for a leading 97.25% first-time pass rate.

🔵 **Automated Instant Data Extraction**

OCR Data Extraction is 100% automated and instantaneous.

🔵 **Global Power**

Our technology supports ID verification from over 249 countries and territories, as well as 7,285 document types from around the world.

🔵 **Easy Integration**

Seamlessly embed our business solution into your web, iOS, or Android workflow.

ID Verification Use Cases

Age Verification	Employee Onboarding	Fraud Detection & Prevention
Customer Account Enrollment	KYC & AML Compliance	KBA & Database Lookup Replacement

ID Verification may be tailored for any industry with custom workflows to meet your use case needs.
