

Identity Verification

Verify identities instantly with the most accurate solution in the industry.

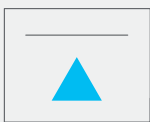

Identity Verification is a comprehensive offering that combines our ID Verification, Biometric Authentication and fraud detection products into a complete package. In seconds, businesses can accurately verify the identities of customers, employees and citizens with the highest accuracy.

Why AuthenticID.

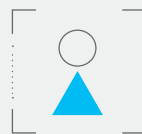

- ✓ **Prevent Fraud:** Detect fraudulent activity with accuracy.
- ✓ **Mitigate Compliance Risk:** Improved underwriting and regulatory protection for KYC and AML.
- ✓ **Increase Customer Conversions:** Create streamlined, frustration-free enrollment and onboarding.
- ✓ **Reduce Operating Costs:** Eliminate manual processes and simplify workflow integrations.

A comprehensive bundle to fight fraud. Here is what's included:

ID Verification

Verify government-issued IDs in seconds. Our 99%+ accuracy detects even the most sophisticated fraudulent documents.

Biometric Authentication

Confirm a person's true identity with a selfie. Includes Face Match and liveness detection for the ultimate protection.

Fraud Shield

Block fraudsters indefinitely. Fraud Shield allows you to identify, flag and add users to the Bad Actor Watchlist.

Platinum Features

 Performance	 Delivery	 Security
<ul style="list-style-type: none"> Fully automated verification in seconds 99%+ accurate counterfeit detection Supports 249 countries globally Instant, accurate ID data extraction Unlimited transactions per minute (TPM) 	<ul style="list-style-type: none"> Multiple capture options – native app, mobile web, desktop Customizable risk and decisioning rules Dashboard user interface for transaction review Fully customizable and white labeled Dedicated hosting or multi-tenant options 	<ul style="list-style-type: none"> Detects 1st party mule fraud, spoofing and breeder document fraud Data retention flexibility – set your own policy or use stateless, auto-purge data processing Consumer consent logging

Enterprise Technology with Ironclad Security

AuthenticID's technology is constantly adapting to its ever-evolving client requirements, regulatory standards and cybersecurity threats. With lightning-fast processing, we have the ability to handle more than 35 million transactions in a single day.

Setup and integration are seamless with options for Web, iOS, and Android native app SDKs and implementation pathways. Maintained by a state-of-the-art security program led by dedicated expert IT and security teams, you can rest assured data and PII are secure. We have passed several 3rd party security audits and meet major regulatory requirements like GDPR, CCPA and more.

Leading Facial Recognition Technology

High Performing Facial Recognition Technology that is consistently top-rated by NIST as a leader in accurate, efficient, and non-bias decisioning.

1:N Identification in 97ms (milliseconds)	1:1 Comparison in 201ns (nanoseconds)
